

Station

Complete lift station ready for use

Sectors of Activity

- Automotive industry
- Mechanical engineering

Applications

- Pump to filtration
- Machine tool
- Grinding machine
- Machine outlet

Paint coating

RE3C7 - C5M - C4

Material declination

- Cast iron GS 500 (Standard)
- NI HARD cast iron (Chrome cast iron)
- Steel 24 - 230 - Stainless steel 316l - Creusabro - Bronze

Customers

STELLANTIS

Know-How

We've been producing lift tanks in France and around the world for over 20 years. Historically present at the PSA Group and Renault-Nissan, we are now pursuing our development at numerous plants in China and Korea with the Hyundai and KIA Groups.

Highlights

- Adapts to machine output
- Compact design
- 100% stand-alone
- autonomous
- Can be run dry without damage
- Operates under heavy load
- Continuous operation or machine cycle
- Adapted to problems

Features

∅ Available	On request
Range use	30 to 400 m ³ /h
Pressure Height	35 mce
Operating temperature	Up to 120°C
Permissible chip loads	15g/l - 200g/l
